cblake@finalbreach.com **Carrick Blake** (770) 963-7686

SUMMARY:

Cybersecurity student with a **3.76 GPA** with work experience in information technology and information security. Seeking an internship on threat intelligence and mitigating threats within cybersecurity.

EDUCATION

Kennesaw State University **Kennesaw, Georgia**

Bachelor of Science in Cybersecurity (GPA 3.76) **August 2023 – May 2028**

- Minor: Criminal Justice

Relevant Courses: Digital Forensics, Server Systems and Security, Network Security

EXPERIENCE

August 2026 - Current

Information Security Intern | *Georgia Bureau of Investigation (GBI), Atlanta, GA*

- Communicated with the vendors of law enforcement agencies to ensure compliance with the FBI's CJIS Security Policy (CJISSECPOL) throughout the state of Georgia.
- Optimized the compliance check process by using PowerShell to find vendor personnel in the GBI's vendor database that have expired or missing documents.
- Managed vulnerabilities through CrowdStrike alongside the GCIC Cyber Security team.

May 2026 – August 2026

Technical Support Analyst/Co-op | *Institute of Nuclear Power Operations (INPO), Atlanta, GA*

- Worked in a team that manages the IT service desk at a nuclear power plant evaluation nonprofit. Solved technical problems faced by employees on Windows machines in an Active Directory environment.
- Utilized PowerShell to automate searching for missing dependency files for legacy applications.
- Assisted in managing laptop and mobile devices containing confidential information by wiping sensitive data when said devices are out of use, further upholding enterprise information and data security policies.
- Achieved customer satisfaction of an average of **4.9/5** stars based on a survey sent to customers upon ticket closure.

PROJECTS

CTF Challenge Write-up Website | *finalbreach.com*

- Created and hosted a website to share solutions to capture the flag challenges from HackTheBox (HTB), filling the lack of information online regarding solving blue-team oriented HTB challenges.
- Topics of challenges solved: threat intelligence, digital forensics, OSINT, and incident response.
- Write-ups included analyzing malicious word documents containing macros, network traffic of hijacked systems, deobfuscating PowerShell scripts, and log analysis of Windows and Linux systems.

National Cyber League (NCL) Spring 2026

- Worked in a team of 4 other students representing Kennesaw State University in a national level cybersecurity competition, placing 273rd out of 3638 universities (top 7.5%).
- Held the role as the team member responsible for solving the log analysis, forensics, and OSINT challenge categories.
- Faced challenges when deciphering coded messages of a simulated targeted operation, but overcame these difficulties by Google dorking to discover key words used correlated to Pokemon Go locations.

CERTIFICATIONS & SKILLS

- **Certifications**: CompTIA, Security+ | Security Blue, Blue Team Level 1
- **Skills**: Linux | Windows | Digital Forensics | SOC | Incident Response | Phishing Analysis | Python | Open Source Intelligence | Threat Intelligence
