PROJECTS

Incident Network Traffic Analysis

HackTheBox (HTB) - [My Documentation](#)

- Performed an analysis of a packet capture file via Wireshark to identify how an attacker gained access to a system.
- Utilized wireshark filters find packets that identified: the attacker's IP address, usage of a PHP vulnerability for RCE, execution of a payload, and a malicious file downloaded.
- Associated the threat's techniques to CVE identifiers and the MITRE ATT&CK Framework.

Microsoft Word Vulnerability Analysis

HackTheBox (HTB) - [My Documentation](#)

- Was provided a malicious Word document that contains an exploit that results in RCE, tasked with discovering how the exploit works.
- Dissected the Word documents' data using the Linux terminal.
- Traced the exploit's characteristics to a corresponding CVE nicknamed Follina and its behavior to the ATT&CK framework.

Risk Management Project

Kennesaw State University - [PDF](#)

- Provided with a real-world scenario of a company wanting a risk audit on its information assets.
- Accounted for each asset and calculated the impact and likelihood of these assets being compromised.
- Organized a system where I assigned a numerical risk value to each asset and provided modern solutions to improve each asset's risk.

CERTIFICATIONS

Security+ - CompTIA, December 2025 - 2028 - [Certification](#)

Blue Team Level 1 - Security Blue Team, June 2025 - [Certification](#)

EXPERIENCE

Kennesaw State University, Kennesaw — Student Teaching Assistant

December 2024 - PRESENT

- Work with assigned professors and students enrolled in classes containing a closed lab in the College of Computing and Software Engineering, improving student grades by 5%.
- Demonstrated a strong attention to detail, to provide critical feedback as well as grade students' work, while meeting deadlines.

Chick-Fil-A, Acworth — Back of House Member

July 2024 - December 2024

- Worked in a team of 7 focused on cooking, and presenting food safely, and efficiently to meet strict Chick-Fil-A standards. Demonstrating effective teamwork and communication to meet these standards.

EDUCATION

Kennesaw State University,
Kennesaw — *Bachelor of
Science in Cybersecurity*

August 2023 - May 2027

- GPA - 3.70/4.0
- Order of the Sword and Shield National Honor Society
- Information Systems Security Association At KSU Member
- Linux Club Member

SKILLS

Hard Skills:

- SIEM
- Phishing Analysis
- Threat Intelligence
- Incident Response
- Cybersecurity Policy

Tools and Software:

- Linux
- Windows
- Wireshark
- Splunk
- Python
- OSINT
- Microsoft Office

Soft Skills:

- Leadership
- Problem Solving
- Critical Thinking
- Time Management
- Communication
- Analytical Skills
